Platypus Quiz page 6

1. What does a platypus like to eat?
Answer: The platypus eat other animals. It eats worms, insect larvae, shrimps and yabbies
2. When swimming does a platypus have its eyes open or closed?
Answer: Closed - It keeps its eyes shut and uses other senses such as hearing and touch
3. The Platypus is a good swimmer, True or False?
Answer: True - It is a very good swimmer and spends much of its time in the water. The toes on its feet are joined. When it swims, it pushes itself along by moving the front two feet. The tail and back feet help it to turn left or right, but does not make it faster.
4. What animal does a Platypus look similar to?
Answer: A Beaver
5. Where do Platypuses live?
Answer: The platypus lives in small streams and rivers over a large area of eastern Australia.
6. Where can the largest Platypuses be found?
Answer: Tasmania. The smaller ones can be found in Queensland
7. Platypuses sleep during the day, True or False?
Answer: True.

Kingswim hopes all our families are staying safe, healthy and happy.
